

IN THE CLAIMS:

This listing of the claims replaces all prior versions and listings of the claims in this application. Please CANCEL claims 1-4, 7-27 and 29-30, without prejudice or disclaimer, as follows:

1-27. (Cancelled)

28. (Previously Presented) A heating crucible for an organic thin film forming apparatus, the heating crucible comprising:

- a main body to contain an organic substance;
- a cover disposed on the main body, the cover being constituted by an insulating material and comprising a nozzle through which a gaseous organic substance comes out from the main body;
- a cover heater disposed on a surface of the cover facing away from the main body, the cover heater being constituted by a thin film type heater;
- a heat-resistant layer disposed so that the cover heater is disposed between the surface of the cover facing away from the main body and the heat-resistant layer;
- a reflective layer disposed between the cover heater and the heat-resistant layer; and
- a body heater disposed on the main body;

wherein the nozzle extends from a surface of the cover facing toward the main body to a surface of the heat-resistant layer facing away from the main body;

wherein an entry opening of the nozzle through which the gaseous organic substance enters the nozzle is flush with the surface of the cover facing toward the main body;

wherein an exit opening of the nozzle through which the gaseous organic substance exits from the nozzle is flush with the surface of the heat-resistant layer facing away from the main body; and

wherein the nozzle converges from the entry opening to a throat of the nozzle at a junction between the cover and the heat-resistant layer, and diverges from the throat of the nozzle to the exit opening.

29-31. (Cancelled)
